

PERSONALIZED WEALTH STRATEGY

Andreea Panetta | October 2025

Executive Summary

A focused 12-month plan to (1) cut 2025 taxes from a high-income/severance year, (2) choose and close a depreciation-rich asset **before Dec 31** (either a short-term rental with **cost segregation + 100% bonus depreciation** or an equipment-heavy business asset purchase), (3) formalize a lean business layer to unlock **Accountable Plan, Augusta Rule, home-office, QBI**, and **Solo 401(k)/SEP** deductions, and (4) automate family investing with **Bitcoin (primary growth), IREN (AI + BTC infrastructure)**, and an **income sleeve** (STRC or MSTY/IMST) sized mostly inside retirement.

Path A range (with STRC)	\$118,500 – \$326,000	Path A range (with MSTY/IMST)	\$122,300 – \$339,760
--------------------------	-----------------------	-------------------------------	-----------------------

“Year-One Value” includes tax savings/refunds, reimbursements, business/STR net, plus conservative investment gains and income.

Current Snapshot

- **2025 income:** severance year; projected **\$770,000** household income; rough tax of **~\$190,000** if no planning.
- **Monthly expenses:** **~\$25,000** (two mortgages: ~\$9k + ~\$4k at **7.5% / 5.6%**, two cars ~\$2k, private school ~\$2k, other ~\$8k).
- **Entities:** LLC holding + trust already set up (Prime Services).
- **Investing coordination:** want unified family plan + automation; invest for young son; backdoor Roth question.
- **Time bandwidth:** limited (both partners). Want clear, step-by-step playbook with maximal tax impact by **Dec 31**.

30 Day Launch Checklist

Week 1 — Structure & Cash Controls

- Create **OpCo LLC** (consulting/management) separate from holding. Open **business checking**.
- Connect **QuickBooks/Zoho**; STR/consulting chart of accounts.
- **W-4** tune to target a small refund; if current 401(k) has Roth deferrals, tilt to **pre-tax** for 2025 cash relief.

Week 2 — Documentation (audit-ready)

- Sign **Accountable Plan** and an **Expense Policy** using **de-minimis** safe harbor (**\$2,500/invoice**).
- **Augusta Rule**: pre-calendar **12–14** meetings with agendas and FMV day-rate comps.
- **Home office**: measure, photograph; calculate *simplified* vs *actual* and pick the larger.

Week 3 — Acquisition Decision Prep

- Line up **two parallel closings** (whichever is most feasible by **Dec 31**):
- **Path A**: STR under contract (avg stay ≤ 7 days) and a **cost-seg** firm engaged.
- **Path B: Asset purchase** with bill of sale itemizing equipment.
- Secure **6 months runway** for whichever you close; avoid spiking personal credit cards.

Week 4 — Family Investing & Docs

- Set up **River** or **Strike** for BTC; order hardware wallet; draft DCA plan.
- Prepare **child employment** framework and **custodial Roth IRA** workflow once earned income exists.
- Schedule **Prime + Incite** joint call (standing monthly) to coordinate entity/tax timing.

Tax Optimization Playbook (with Year-One Estimates)

1. Accountable Plan reimbursements (LLC → you)

Phone/internet %, mileage, home-office reimbursements monthly via ACH with receipt pack.

Estimated value: \$3,000 – \$6,000

2. Home office deduction (pick higher each year)

- **Simplified:** \$5/sq-ft up to \$1,500.
- **Actual:** allocate mortgage interest/HOA, utilities, insurance, repairs, depreciation by business-use %.

Estimated value: \$2,000 – \$4,000

3. Augusta Rule — up to 14 tax-free days

Agendas, minutes, FMV comps (\$300–\$500/day feasible in many metros), invoice, ACH proof.

Estimated value: \$4,200 – \$7,000

4. Startup & organizational costs (Sec. 195/248)

Deduct up to \$5k + \$5k in Year One for new operations; remainder amortized.

Estimated value: \$1,000 – \$2,000

5. Tangible Property optimization

De-minimis ≤ \$2,500/invoice; 12-month rule for eligible prepaids.

Estimated value: \$1,000 – \$3,000

6. Vehicle & travel

Mileage method early; 50% meals on business trips; contemporaneous logs.

Estimated value: \$1,000 – \$3,000

7. QBI (199A)

Up to 20% deduction on qualified business income (consulting/management OpCo; STR OpCo).

Estimated value: \$5,000 – \$15,000

8. Retirement on LLC profit

Start light 1099 consulting in OpCo; add Solo 401(k) employer contribution (or SEP-IRA) on profit.

Estimated value: \$5,000 – \$15,000

9. Employ your child (family management company)

Pay reasonable wages for real work; fund custodial Roth IRA.

Estimated value (tax delta): \$3,000 – \$5,000

10. **Charitable bunching / Donor-Advised Fund (optional)**

Estimated value: \$9,000 – \$18,500 (cash outflow strategy; include only if you plan to give)

11. **Health accounts (if eligible)**

HSA and/or FSA/Dependent-Care FSA.

Estimated value: \$1,000 – \$3,000

12. **Backdoor Roth readiness**

Roll pre-tax IRA balances into an employer or Solo 401(k) before 12/31 to avoid pro-rata.

13. **Cost Segregation + 100% Bonus (Path A)**

If STR closes by Dec 31, qualifies as STR (avg stay ≤ 7 days) and you materially participate, a formal cost seg can reclass 20–30% of building basis into bonus-eligible property.

Scenario table (tax value in Year One):

- \$800k building basis: bonus \$160k–\$240k → \$45k–\$89k refund
- \$1.0M basis: bonus \$200k–\$300k → \$56k–\$111k refund
- \$1.2M basis: bonus \$240k–\$360k → \$67k–\$133k refund

Basis excludes land; model future recapture if selling soon.

Estimated value (used in totals): \$50,000 – \$150,000

Tax strategy subtotal (before cost seg): \$30,200 – \$79,500

Cost seg add-on (Path A only): + \$50,000 – \$150,000

Acquisition Options (Close by Dec 31)

Path A — Short-Term Rental (qualifying STR) + Cost Seg

- Checklist: average stay ≤ 7 days, material participation (time logs), STR permits/registrations, DSCR ≥ 1.25 on realistic ADR/occupancy, 6-month runway.
- Place in service in 2025 (furnished, photos, live listing) to lock bonus.
- Target net: **\$18,000 – \$36,000/yr** after all costs.

Path B — Equipment-Heavy Asset Purchase (no real estate)

- Examples: vending route, laundromat equipment set, med-aesthetic devices placed at a host clinic, car-wash/EV-charger hardware, commercial kitchen equipment.
- Bill of sale itemization enables 100% bonus in 2025.
- Target net: **\$12,000 – \$24,000/yr** on conservative ramp.

If neither can close cleanly by Dec 31, run Path C this year and target A or B in Q1–Q2 next year.

Investment Strategy & Capital Deployment

Bitcoin (primary engine)

- **Lump-sum:** after funding 6-month runway, deploy \$50,000 – \$150,000 (or 10–15% of any net sale proceeds) before year-end.
- **DCA:** \$1,500–\$3,000/mo thereafter, plus +\$250–\$500/mo when a new unit or asset turns profitable.
- **On-ramps:** River or Strike.
- **Custody:** exchange (temporary) → hardware wallet → 2-of-3 multisig with split key storage.
- **Altcoin policy:** migrate 90–95% of any non-BTC crypto into BTC over 6–12 months (harvest losses first; stagger gains).

Year-One BTC gain used in totals (illustrative): \$15,000 – \$45,000

IREN satellite (AI data centers + BTC infrastructure)

- Target 1–3% via 2-month DCA.

Year-One gain used in totals: \$3,000 – \$9,000

Income sleeve (retirement preferred)

- **STRC:** steadier, 8–10% distribution.
- **MSTY/IMST:** higher, variable; options-income on MSTR; 12–18% distribution, upside capped.
- **Sizing:** \$50,000 – \$100,000 (≈5–10% of retirement). DCA 3 months; reinvest unless cash needed.

Year-One income used in totals:
STRC \$4,000 – \$10,000 • MSTY/IMST
\$6,000 – \$18,000

Year One Value Breakdown

Tax and Documentation Strategies	Range
Accountable Plan	\$3,000 – \$6,000
Home office	\$2,000 – \$4,000
Augusta Rule	\$4,200 – \$7,000
Startup/organizational	\$1,000 – \$2,000
De-minimis & 12-month rule	\$1,000 – \$3,000
Vehicle & travel	\$1,000 – \$3,000
QBI	\$5,000 – \$15,000
Retirement on LLC profit	\$5,000 – \$15,000
Employ child (and Roth)	\$3,000 – \$5,000
HSA/FSA (if eligible)	\$1,000 – \$3,000
Charitable bunching/DAF (if used)	\$9,000 – \$18,500
W-2 timing & pre-tax shift	\$3,000 – \$6,000

Tax subtotal (before cost seg): \$30,200 – \$79,500

Cost seg + 100% bonus (Path A only): + \$50,000 – \$150,000

Business Cash Flow	Range
Path A — STR net after optimization	\$18,000 – \$36,000
Path B — Equipment-asset net	\$12,000 – \$24,000
Path C — No acquisition	\$0

Investment Growth/Income	Range
Bitcoin gains	\$15,000 – \$45,000
IREN gains	\$3,000 – \$9,000
STRC income	\$4,000 – \$10,000
MSTY/IMST income	\$6,000 – \$18,000

Year-One Totals

Path A — STR with cost seg + 100% bonus

- **with STRC:** \$118,500 – \$326,000
- **with MSTY/IMST:** \$122,300 – \$339,760

Path B — Equipment-heavy asset (bonus)

- **with STRC:** \$92,000 – \$236,000
- **with MSTY/IMST:** \$95,800 – \$249,760

Path C — No acquisition this year

- **with STRC:** \$47,500 – \$107,000
- **with MSTY/IMST:** \$51,300 – \$120,760

12-Month Timeline

- **Q4 (Now–Dec 31):** lock structure, policies, Augusta calendar; pick Path A or B; get under contract; place in service this year; initiate BTC lump-sum and start DCA; deploy sleeve in retirement.
- **Q1 (Jan–Mar):** finalize cost seg (Path A) or install/activate equipment (Path B); start light consulting for QBI + Solo-401(k) employer contribution; child employment & Roth.
- **Q2 (Apr–Jun):** optimize pricing/operations; quarterly tax projection; adjust DCA and sleeve sizing.
- **Q3–Q4:** evaluate second asset/unit only if runway and KPIs are met; year-end timing (12-month rule, prepaids), charitable bunching if used.

Key Success Factors

- **Documentation** first (monthly reimbursement packs; Augusta agendas/minutes + FMV comps; itemized equipment/furnishings lists).
- **Material participation** (Path A) and **placed-in-service** dates documented for bonus.
- **Six-month runway** before any lease or purchase.
- **Automation** for BTC DCA; custody upgrades on schedule.
- **Quarterly** KPI + tax projections with Prime & Incite.

Action Plan — This Week

1. Book a Prime + Incite joint strategy call (recurring monthly).
2. Sign the Accountable Plan and start the Augusta calendar.
3. Home-office actual vs simplified worksheet; pick the larger.
4. Choose Path A or B (or C), get the purchase under contract; confirm placed-in-service plan by Dec 31.
5. Open River/Strike, schedule the BTC lump-sum window and set DCA.
6. Size the income sleeve (STRC or MSTY/IMST) inside retirement; begin 3-month DCA.
7. Set up child employment workflow and a custodial Roth IRA template.
