

PERSONALIZED WEALTH STRATEGY

Brady Bai | Prepared October 2025

CLIENT PROFILE SNAPSHOT

Metric	Current Position	Why It Matters
Household Income	~\$200,000 (primary earner ~\$120,000)	Strong earnings to fund a proof-of-concept launch if routed with intention.
Debts	\$19,500 auto; \$15,000 credit card (~50% utilization)	High utilization suppresses credit score and financing options; must drop below 30%.
Mortgage	\$3,000/month	Large fixed cost; informs runway and risk tolerance.
Home Equity	~\$300,000	Optional future runway; keep off-limits until proof of concept.
Retirement	~\$100,000	Continue compounding; avoid disruptive withdrawals.
Primary Goal	Airbnb live by early 2026 (cohosting → decision gate → arbitrage or ownership)	Clear deadline and sequence prevent overreach.

Metric	Current Position	Why It Matters
Secondary Goal	Tax optimization and stronger monthly cash position	Funds Bitcoin stacking and business growth with minimal personal risk.
Constraints	Limited time; VA support preferred from day one; minimal personal guarantees	Drives the order of operations and funding choices.
Programs	PRIME + entry Airbnb track; evaluating Ascension	Tools and VA budget included in plan.

PRIORITY ORDER (NEXT 12-18 MONTHS)

1. Cash control + credit cleanup (cut waste; drop personal utilization)
2. Entity + tax stack live (accountable plan, Augusta Rule, 100% bonus depreciation)
3. Cohosting first (VA-assisted) → decision gate (arbitrage vs. ownership)
4. Bitcoin plan (no cap) and 90-95% altcoin → BTC migration (if applicable)
5. Income sleeve (retirement only): STRC for steadier dividends or MSTY/IMST for higher/variable payouts
6. Business credit ladder (no personal co-mingling) to fund furnishings/ops when needed

CASH FLOW & CREDIT TUNE-UP (START THIS WEEK)

Actions

- **50/30/20 caps** on take-home in Monarch/YNAB: Needs 50%, Wants 30%, Savings/Debt 20%
- **Trim variable spend** (subscriptions/dining/Amazon) to free \$400-\$700/month
- **Lower personal CC utilization** without tapping personal assets:

- Open Tier-1 business tradelines (Uline/Quill/Shirtsy) + one 0% business card (Divvy/Ink/Amex)
- Move business-eligible charges off the personal card; perform a weekly Friday sweep to keep personal utilization below 30% on statement dates
- **Auto loan:** refinance or ramp principal to lower payment \$100-\$150/month by Month 6-9
- **Emergency fund:** build \$5,000 quickly → toward 3 months as cohosting stabilizes

Expected 90-day effect: \$400-\$700/month freed and a visible utilization drop (improved credit terms).

ENTITY, TAX & DOCUMENTATION STACK

In-Year Cash Flywheel

- **OpCo LLC** for STR/cohosting with Relay bank + QuickBooks; no co-mingling
- **Accountable plan:** reimburse phone/internet/mileage/home-office (policies + receipts/logs)
- **Augusta Rule:** up to 14 home-rental days/year to the LLC at fair-market rate (agenda, minutes, invoice)
- **100% bonus depreciation (now):** first-year write-off for STR furnishings/equipment (locks, linens, laptop, camera, shelving) placed in service this year
- **W-4 optimization** so tax savings show up during the year, not only as refunds
- **CPA coordination** for STR material participation and cost-seg timing

Additional Levers (If Applicable)

- HSA (with HDHP): triple-tax advantage
- Dependent Care FSA: up to \$5,000 pre-tax
- Energy credits (25C/25D) for planned efficiency upgrades
- Charitable "bunching" every other year to exceed the standard deduction

Target year-one tax value (documented): \$8,000-\$15,000 (conservative)

STR BUILD: COHOSTING → DECISION GATE → ARBITRAGE OR OWNERSHIP

A) Cohosting (Fastest Proof; VA-Friendly)

Component	Implementation
Offer	Listing optimization, dynamic pricing (PriceLabs), guest comms (Hospitable), cleaner coordination, monthly KPI report
VA	10-15 hrs/month for comms/re-listing/reporting (\$200-\$300/month)
Fee	20% of gross (range 15-25% by service scope)
Pipeline	Outreach 25 owners (underperformers/host fatigue) → 5 calls → 1-2 clients
Proof	30-day performance report (ADR, RevPAR, response time) for renewals and referrals

Why cohosting first: low capital, minimal personal risk, solves time with a VA, and builds lender-friendly operating history.

Decision Gate (Month 4-5): Arbitrage Now, or Not Yet?

Proceed to arbitrage only if **all** are true:

- A cohosting client has run 60+ days and is profitable
- Personal utilization is below 30% and trending down
- Six months of projected unit expenses exist in business cash/credit runway (Tier-2/3 lines active)
- Household buy-in exists to proceed without personal cards/HELOC

If any item fails: add a second cohost first or explore ownership via DSCR/portfolio financing sized to cash flow.

B) Arbitrage (Only After the Gate Is Passed)

Component	Implementation
Startup	\$5,000-\$7,000 (furnishings + deposits)
Funding	Business credit (0% promo) + vendor accounts (no personal cards/HELOC)
Net Target	\$700-\$1,000/month once stabilized
Tax	100% bonus depreciation on furnishings in year 1
Risk Control	Maintain 6 months of unit expenses on hand before signing

C) Ownership (Late-2026 Readiness)

- **Financing:** DSCR or portfolio loan sized to cash flow (avoid owner-occ conflicts)
- **Cost segregation** after close; track material participation to access STR treatment
- Consider a co-purchase framework that limits personal guarantees while giving household visibility

BUSINESS CREDIT LADDER (NO PERSONAL CO-MINGLING)

- **Tier 1 (Month 1-2):** Uline, Quill, Shirtsy (reporting net-30s)
- **Tier 2 (Month 3-4):** Amazon Business, Dell/Staples (revolving)
- **Tier 3 (Month 5-7):** Amex Blue Biz, Chase Ink, Divvy (0%/low-APR offers)

Target: \$25K-\$50K usable business credit by Month 9-12 (VA, furnishings, ads)

BITCOIN PLAN (NO CAP) + ALTCOIN POLICY

If any non-BTC holdings exist, migrate 90-95% to Bitcoin over 6-12 months (sell losses first; phase gains around bonus-dep/STR deductions).

DCA Schedule

- Start \$300-\$500/month now
- Raise to \$750-\$1,000/month once cohosting is steady and personal utilization normalizes
- After arbitrage stabilizes: add +\$250-\$500/month per profitable unit

Custody Path

River/Swan buys → hardware wallet (single-sig) → 2-of-3 multi-sig when above 1 BTC; distribute key shards (home safe, bank box, trusted third party).

No preset cap or rebalancing. Stack as high as practical after reserves and obligations.

OPTIONAL INCOME SLEEVE (RETIREMENT ONLY): STRC VS MSTY VS IMST

Feature	STRC (Steadier)	MSTY (Higher/Variable)	IMST (Higher/Variable)
Instrument	Variable-rate preferred stock (MicroStrategy) with monthly dividends	Options-income ETF on MSTR	Options-income ETF on MSTR
Income Style	More predictable, dividend-like	Higher headline payouts; variable with volatility	Similar objective; typically thinner liquidity
Pros	Stability; dividend priority over common	Maximum income potential; simple ETF	Similar high income; BTC-adjacent story

Feature	STRC (Steadier)	MSTY (Higher/Variable)	IMST (Higher/Variable)
Cons	Lower liquidity; rate/issuer risk	Capped upside; payout swings	Capped upside; slippage risk
Where to Hold	Solo 401(k)/IRA	Solo 401(k)/IRA	Solo 401(k)/IRA
Sizing	10-15% of retirement assets once BTC plan is humming	10-15%	10-15%

How to choose: prefer predictability → STRC; prefer maximum payout with variability → MSTY/IMST. Dollar-cost average over 3 months; reinvest until income is desired.

12-MONTH EXECUTION TIMELINE

Month	Key Actions	Result
Oct 2025	Form OpCo LLC; Relay + QuickBooks; set accountable plan + Augusta; lock 50/30/20; cut \$400-\$700/mo	Cash control + tax engine on
Nov 2025	Tier-1 vendors; draft cohosting one-pager + contract; recruit VA (10-15 hrs/mo)	Credit building + capacity

Month	Key Actions	Result
Dec 2025	Owner outreach 25; 5 calls; sign 1 cohost; install Hospitable + PriceLabs	First cash-flow lane on
Jan 2026	Weekly KPI report; personal utilization below 30% via business routing	Credit improves
Feb 2026	Tier-2 revolving; BTC DCA → \$750-\$1,000/mo if cash allows	Stacking accelerates
Mar 2026	Tools budgeted; decision gate on arbitrage vs. ownership	Choose path with household buy-in
Apr 2026	If gate passed, sign 1 arbitrage; furnish on business credit; 100% bonus dep	+\$700-\$1,000/mo net
May 2026	Mid-year tax projection; capture Augusta + accountable reimbursements	Tax savings realized
Jun 2026	Consider Solo 401(k); start 3-month DCA into STRC or MSTY/IMST (10-15%)	Income sleeve online
Jul-Sep 2026	Evaluate cohost #2 or raise fee; keep EF ≥ 3 months; prep ownership options	Scale with control

YEAR-ONE ROI SNAPSHOT (OCT 2025 → SEP 2026)

Path A: Income Sleeve = STRC (Steadier Dividends)

Component	Low	High	Notes
Spending cuts	\$4,800	\$8,400	\$400-\$700/mo
Cohosting (1 client, VA-assisted)	\$3,600	\$7,200	\$300-\$600/mo net after VA/tools
Arbitrage (1 unit, partial-year if launched Apr-May)	\$4,200	\$8,000	6-8 months
Tax stack (Augusta + accountable + 100% BD)	\$8,000	\$15,000	Documentation-dependent
BTC upside (illustrative)	\$1,000	\$3,000	From staged DCA; not guaranteed
Income sleeve (STRC)	\$1,500	\$3,000	Partial-year DCA on ~\$25K-\$50K
TOTAL YEAR-ONE BENEFIT (STRC)	\$23,100	\$39,600	

Path B: Income Sleeve = MSTY/IMST (Higher, Variable Payouts)

Component	Low	High	Notes
Spending cuts	\$4,800	\$8,400	\$400-\$700/mo
Cohosting (1 client, VA-assisted)	\$3,600	\$7,200	\$300-\$600/mo net
Arbitrage (1 unit, partial-year)	\$4,200	\$8,000	6-8 months
Tax stack (Augusta + accountable + 100% BD)	\$8,000	\$15,000	Conservative
BTC upside (illustrative)	\$1,000	\$3,000	Not guaranteed
Income sleeve (MSTY/IMST)	\$1,500	\$5,000	Variable distributions; partial-year DCA
TOTAL YEAR-ONE BENEFIT (MSTY/IMST)	\$23,100	\$46,600	

If the decision gate says "not yet" to arbitrage, remove that row from both tables; the rest of the plan still delivers meaningful progress and proof.

IMMEDIATE 30-DAY CHECKLIST

- Open OpCo LLC bank + QuickBooks; create receipts folder and mileage log
- Adopt accountable plan; calendar 14 Augusta dates with agendas and fair-market rent
- Hard-cap Wants; cut \$400-\$700/mo; enable the Friday utilization sweep on the personal card

- Apply Uline/Quill/Shirtsy; pay net-30s early to build tradelines
- Draft cohosting one-pager, pricing, contract; shortlist 25 underperforming owners
- Hire VA (10-15 hrs/mo) for comms + KPI reporting (\$200-\$300/mo)
- Start BTC DCA \$300-\$500/mo (River/Swan); set custody upgrade (>1 BTC → 2-of-3 multi-sig)
- Build arbitrage buy-box + landlord pitch; confirm STR rules for target ZIPs
- Price umbrella policy; verify homeowners/auto limits for liability stack
