

PERSONALIZED WEALTH STRATEGY

Dan Kovacich | October 2025

Executive Summary

A 12-month plan to: (1) decide **keep vs sell** on the current Airbnb using a strict **Decision Gate**, (2) maximize **tax savings** with an audit-ready entity + documentation stack (Accountable Plan, Augusta Rule, de-minimis/12-month rule, QBI, Solo-401(k)/SEP), (3) if you **keep the STR**, consider **cost segregation + 100% bonus depreciation** in Year One, (4) if you **sell**, eliminate HELOC/CC debt and redeploy into a better DSCR unit, and (5) put **lump-sum + DCA** into **Bitcoin (primary)**, add a small **IREN** satellite, and a simple **income sleeve** (STRC or MSTY/IMST)—with investment results now included in Year-One totals.

🎯 **Year-One Value**
— Path A (Keep & Optimize, no cost seg)
\$55,530 – \$121,550 (STRC) | \$56,470 – \$125,310 (MSTY/IMST)

🎯 **Year-One Value –**
Path A (Keep & Optimize, with cost seg + 100% bonus)
\$100,530 – \$261,550 (STRC) | \$101,470 – \$265,310 (MSTY/IMST)

🎯 **Year-One Value**
— Path B (Sell, Pay Down, Redeploy)
\$57,530 – \$135,500 (STRC) | \$58,470 – \$139,260 (MSTY/IMST)

Definition “Year-One Value” = cash benefit from tax, reimbursements, debt savings, STR net + conservative investment gains/income.

Current Position — Snapshot

- **Monthly inflows:** Dan W-2 ≈ **\$9,400** net; Dan biz ≈ **\$3,000**; Brigit salary ≈ **\$5,000**; Brigit biz ≈ **\$25,000**.
- **STR real estate:** mortgage ≈ **\$515k**; market value ≈ **\$1,375,000**.
- **Debt:** credit cards ≈ **\$45k**; **HELOC** ≈ **\$210k**; housing/rental expense ≈ **\$8,821/mo**; paying **\$2,800/mo** to debt.
- **Retirement:** **SD-IRA** ≈ **\$340k** (BTC-capable); **401(k)** ≈ **\$130k**; Fidelity brokerage/IRA active.
- **Businesses:** **AccuFooting.com** (e-com; Home Depot trial live), **Caliber Energy** (consulting).

30 Day Launch Checklist

Week 1 — Foundation

- Confirm separate **LLCs + bank accounts** for STR OpCo, AccuFooting, Caliber.
- Connect **QuickBooks/Zoho**; STR/consulting chart of accounts.
- **W-4** right-size; tilt a portion of deferral to **pre-tax 401(k)** for near-term cash relief.

Week 2 — Documentation & Policies

- **Accountable Plan + Expense Policy** (de-minimis **\$2,500/invoice**).
- **Augusta**: pre-calendar **12–14** meetings (agendas, minutes, FMV comps).
- **Home office**: measure/photo; select **simplified vs actual** (choose higher).

Week 3–4 — Credit, Systems & Decision Prep

- Start **monthly reimbursements** (PDF pack + **ACH** LLC → personal).
- Debt playbook: ask for **HELOC rate reduction/IO** window; price **0% BT** for \$45k cards.
- STR ops: **Hospitable + PriceLabs** live; listing QA + pricing ladder.
- Schedule **Prime + Incite** joint call; assemble **Decision Gate** packet.

Keep-vs-Sell Decision Gate (Run in Week 5)

Advance with KEEP & OPTIMIZE if *all* are true

- Trailing 60-day RevPAR $\geq 2.0\times$ LTR-equivalent and trending up.
- Stabilized **net** $\geq$ **\$1,500/mo** after all costs (incl. capex reserve + cleaning).
- **DSCR** ≥ 1.25 at realistic ADR/occupancy.
- **6 months** STR operating runway without personal cards/HELOC increases.

Choose SELL & REDEPLOY if *any* are true

- Net $<$ **\$1,000/mo** after 60 days of optimization.
- Sale eliminates **HELOC + cards**, freeing $\geq$ **\$1,000–\$2,000/mo** interest/cash flow.
- Redeploying to a better **DSCR** unit (or two smaller units) yields higher, steadier net.

Tax Optimization Playbook — Audit-Ready

1. W-2 timing & pre-tax shift

Right-size refund; move some Roth → traditional 401(k).

Estimated value: \$3,000 – \$6,000

2. Accountable Plan reimbursements

LLCs → you: phone, internet, mileage, home office.

Estimated value: \$3,000 – \$6,000

3. Home office deduction

Simplified up to \$1,500 vs. actual allocating interest/HOA, utilities, insurance, R&M, depreciation.

Estimated value: \$2,000 – \$3,000

4. Augusta Rule

12–14 tax-free days with agendas, minutes, FMV comps, invoice, and ACH proof.

Estimated value: \$3,500 – \$5,000

5. Startup & organizational (Sec. 195/248)

For new STR/holdcos.

Estimated value: \$1,000 – \$2,000

6. Tangible property optimization

De-minimis ≤ \$2,500/invoice; 12-month rule for eligible prepaids.

Estimated value: \$1,000 – \$2,000

7. 100% Bonus Depreciation via Cost Seg (Path A only)

Requires STR qualification (avg stay ≤ 7 days) and material participation.

Estimated value add-on: \$45,000 – \$140,000 (see scenario table)

8. Vehicle & travel

Mileage early; 50% meals; contemporaneous logs.

Estimated value: \$1,000 – \$2,000

9. Schedule C deductions

PD, software, marketing, supplies ($\leq$ \$2,500/item).

Estimated value: \$3,000 – \$8,000

10. QBI (199A)

Up to 20% on qualified business income below phase-outs.

Estimated value: \$4,000 – \$12,000

11. Retirement on LLC profit

Solo-401(k) employer or SEP (after W-2 match).

Estimated value: \$5,000 – \$15,000

12. Debt-interest savings (Path B only)

Sell $\rightarrow$ pay down HELOC + cards.

Estimated value: \$12,000 – \$24,000

Cost Seg + 100% Bonus — Scenario Table

Building basis*	Portion reclassified	Bonus-eligible deduction	Approx. tax value @ 28–37%
\$500,000	20–25%	\$100k – \$125k	\$28k – \$46k
\$800,000	20–30%	\$160k – \$240k	\$45k – \$89k
\$1,000,000	20–30%	\$200k – \$300k	\$56k – \$111k

* Basis excludes land; model recapture risk if selling within a few years.

Investment Strategy & Capital Deployment

Bitcoin (primary engine; no preset cap)

- **Lump-sum:** after 6-month runway and Gate decision, deploy **\$25k–\$75k** (or 10–15% of net sale proceeds in Path B).
- **DCA: \$1,000–\$2,000/mo**, plus +\$250–\$500/mo per profitable unit.
- **On-ramps:** River or Strike. Temporary exchange custody → hardware wallet → 2-of-3 multisig as holdings grow; shard key storage.
- **Alt policy:** migrate 90–95% of non-BTC crypto into BTC over 6–12 months; harvest losses first and stagger gains.

IREN satellite (AI + BTC infrastructure)

- Size at **1–3%** via 2-month DCA; thesis is power-dense AI compute + bitcoin network leverage.

Income sleeve (retirement preferred)

- **STRC (steadier):** dividend-style distributions; priority over common.
- **MSTY/IMST (higher, variable):** options-income on MSTR; upside capped; variable distributions.
- **Size:** 5–10% of retirement balances; DCA 3 months; reinvest until cash is needed.

Investment Growth/Income (Year-One) — Assumptions Used

- **BTC gains (lump-sum + DCA):** \$9,300 – \$26,100
- **IREN gains:** \$1,400 – \$4,200
- **Income sleeve:** STRC \$1,880 – \$4,700 *or* MSTY/IMST \$2,820 – \$8,460

Year-One Value Breakdown (Includes Investments)

Tax & Documentation Strategies	
W-2 timing & pre-tax shift	\$3,000 – \$6,000
Accountable Plan reimbursements	\$3,000 – \$6,000
Home office deduction	\$2,000 – \$3,000
Augusta Rule (12–14 days)	\$3,500 – \$5,000
Startup & organizational	\$1,000 – \$2,000
De-minimis & 12-month rule	\$1,000 – \$2,000
Vehicle & travel	\$1,000 – \$2,000
Schedule C deductions	\$3,000 – \$8,000
QBI (199A)	\$4,000 – \$12,000
Retirement on LLC profit	\$5,000 – \$15,000
Tax strategy subtotal (before cost seg)	\$26,500 – \$61,000
Business Cash Flow	
Path A — STR net after optimization	\$16,450 – \$25,550
Path B — Debt-interest savings + new unit partial-year net	\$18,450 – \$39,500
Investments (add to either path; pick one income sleeve)	
BTC gains	\$9,300 – \$26,100
IREN gains	\$1,400 – \$4,200
Income sleeve — STRC	\$1,880 – \$4,700
Income sleeve — MSTY/IMST	\$2,820 – \$8,460

Year-One Totals (by path & sleeve)

- **Path A (no cost seg):** \$55,530 – \$121,550 (STRC) | \$56,470 – \$125,310 (MSTY/IMST)
- **Path A (+ cost seg):** \$100,530 – \$261,550 (STRC) | \$101,470 – \$265,310 (MSTY/IMST)
- **Path B:** \$57,530 – \$135,500 (STRC) | \$58,470 – \$139,260 (MSTY/IMST)

Coordination Plan — Prime + Incite + You

- Monthly 30-min joint call (standing invite to both teams).
- One-page Strategy Packet: entity map, accounts, KPIs, Decision Gate status, open tax items, upcoming purchases, Augusta calendar.
- Shared folder: P&L by entity, reimbursement packs, Augusta docs, mileage logs, furnishing inventories, STR KPI snapshots.

12-Month Timeline

- **Q1 (Months 1–3):** Entities live; policies signed; Augusta calendar active; listing overhaul; W-4/401(k) tilt; BTC DCA after runway; Gate in Week 5–8.
- **Q2 (Months 4–6):** *Path A* place furnishings/gear & consider cost seg; *Path B* sell, wipe HELOC + cards, lock DSCR criteria, begin redeploy.
- **Q3 (Months 7–9):** Deploy income sleeve in retirement; add IREN; expand business credit as needed.
- **Q4 (Months 10–12):** Year-end timing (bonus/12-month rule); tax projection; rebalance; Year-2 plan.

Key Success Factors

- **Documentation** first: reimbursement packs, Augusta agendas/minutes + FMV comps, itemized furnishing lists.
- **Six-month runway** before any lease/purchase; **DSCR ≥ 1.25** at realistic ADR/occupancy.
- **Quarterly** KPIs + tax projections with Prime + Incite.
- **Automatic BTC stacking;** custody upgrades on schedule; alt exposure minimized.

Immediate Next Steps (This Week)

1. Book the **Prime + Incite** joint strategy call (recurring).
 2. Sign **Accountable Plan + Expense Policy**; publish the **Augusta** calendar.
 3. Run **home-office** worksheet (actual vs simplified) and lock this year's method.
 4. Export STR KPIs; deploy **pricing ladder** + photo refresh.
 5. Finalize the **Decision Gate** packet; calendar the review in Week 5.
 6. Build itemized **furnishings/gear** lists (date/vendor/cost) to prep for bonus placement.
 7. Confirm **BTC** on-ramp (River/Strike), lump-sum window after runway, and DCA start date.
-
