

PERSONALIZED WEALTH STRATEGY

Dustin Salerno | October 2025

Executive Summary

A 12-month, step-by-step plan to (1) regain monthly breathing room, (2) lower taxes using a simple, audit-ready business layer, (3) launch a time-light cohosting service as the fastest path to cash flow with a VA doing the heavy lifting, and (4) automate Bitcoin accumulation with no preset cap. Arbitrage or STR ownership are optional second-phase moves, only after a clear decision gate is passed for credit, runway, and one client operating.

Year-One Value (base: tax + cohosting only)	\$14,900 – \$27,700	Year-One Value (with 1 arbitrage unit partial-year)	\$18,400 – \$35,200
--	----------------------------	--	----------------------------

Optional adds if chosen: small BTC-linked income sleeve inside retirement (+\$400 – \$1,500) and bonus depreciation on arbitrage furnishings (+\$1,200 – \$2,400 tax value).

30 Day Launch Checklist

Week 1 — Cash & Clarity

- Load all cards with promo end-dates into a calendar; pay 3–5 days before statement cut to keep utilization and fees down.
- Direct any surplus to LendingClub 10.84% first.
- Call card issuers for hardship or temporary APR relief on any non-0% balance.
- Move bill-pay to two set dates per month to prevent misses.

Week 2 — Entity & Policies

- Form single-member LLC and open business checking, no commingling.
- Sign an Accountable Plan covering phone, internet, home office method, mileage, and monthly reimbursement.
- Create a receipt pack template and reimburse monthly from the LLC.

Week 3 — Home Office & Augusta

- Measure and photograph the home office; compare simplified vs. actual and adopt the larger.
- Create an Augusta calendar of 12–14 meetings per year with agendas, minutes, FMV comps, and an invoice to the LLC.

Week 4 — Cohosting Setup (time-light)

- Draft a one-page offer: listing optimization, dynamic pricing, communications, cleaner coordination, monthly KPI report.
- Hire a VA for 10–15 hrs/mo to run comms and reporting in Hospitable and PriceLabs.
- Build a 25-owner outreach list and book 5 calls.

Tax Optimization Playbook

1. Accountable Plan reimbursements

Receive tax-free reimbursements for business use of phone, internet, home office, and mileage while the LLC deducts them. Use a written policy and a monthly packet, then ACH from the LLC to you.

Estimated Year-One Value: \$1,800 – \$3,200

2. Home office — choose the larger method

Simplified allows \$5 per sq-ft up to \$1,500 per year. Actual is the business percentage of mortgage interest, utilities, homeowners insurance, repairs, property tax, and depreciation.

Example: 120 sq-ft office in a 1,200 sq-ft home equals 10% business use; with annual housing cost near \$36,000, actual is roughly \$3,600 before depreciation.

Estimated value: \$1,500 – \$3,600

3. Augusta Rule (up to 14 days tax-free)

Rent your home to the LLC for documented board meetings. Payments are tax-free to you and deductible to the LLC. Save 2–3 local meeting-space comps for each meeting to support FMV.

Estimated value: \$2,100 – \$3,500

4. Mileage and local travel

Keep a log for owner meetings, supply runs, and showings to capture every eligible mile.

Estimated value: \$400 – \$900

5. QBI (Section 199A) on cohosting profit

Potential 20% deduction if the LLC is profitable and within income thresholds.

Estimated value: \$800 – \$2,400

6. De-minimis and 12-month rule

Expense items at or below \$2,500 per invoice such as locks, cameras, tablets, linens, and kits. Prepay eligible 12-month items like insurance or certain software that do not extend past next tax year.

Estimated value: \$300 – \$800

7. Retirement coordination

Capture your wife's 401(k) match. If the LLC shows profit, consider a starter Solo 401(k) employer contribution even if modest in Year One.

Estimated value: \$300 – \$1,200

If arbitrage launches: 100% bonus depreciation on furnishings and gear placed in service in the first year (not the building). At a \$6k–\$9k furnish, tax value is roughly \$1,200 – \$2,400 depending on bracket.

Airbnb Arbitrage Execution Plan

Market Screening Criteria

- Only proceed after the decision gate is passed: on-time card payments, LendingClub loan materially reduced, 3–4 months of unit expenses available, one cohost client stable 60+ days, and household alignment to use business credit.
- Prefer one-bedroom units with startup of \$5k–\$7k and realistic net of \$700–\$1,000 per month once stabilized.
- Tax advantage: 100% bonus depreciation on furnishings in year one.

Unit Economics Framework

- Startup: deposits + furnishings \$5k–\$7k.
- Revenue: moderate seasonality; target margin after tools and cleaning contracts.
- Net target: \$700–\$1,000 per month per 1-bed once stabilized.
- Funding: business credit ladder only; avoid personal cards and guarantees where possible.

Launch Sequence

- Sign lease using business entity and negotiated addendum for STR use where permitted.
- Furnish and inventory; capture all receipts for de-minimis and bonus depreciation.
- Connect dynamic pricing and comms (PriceLabs + Hospitable). Configure VA SOPs.
- Go live, monitor KPIs weekly, and tune pricing and operations during first 30 days.

Investment Strategy and Portfolio Allocation

Core Philosophy. Simple, rules-based Bitcoin-first accumulation while cash flow improves and debt falls. Avoid altcoins. Use a clear custody progression and only size an optional income sleeve inside retirement accounts when cash is comfortable.

Primary Engine — Bitcoin Accumulation

- Start DCA immediately at \$25–\$50 per week via River or Strike. Increase to \$100–\$200 per week as high-cost debt drops and a cohost client is live.
- After three consistent months, consider a small lump-sum purchase using a freed minimum payment.
- Custody path: exchange (short) → hardware wallet → 2-of-3 multisig after balance exceeds 1 BTC.
- Avoid altcoins; if any holdings exist, migrate 90–95% to BTC over 6–12 months.

Accelerators — Cash-Flow Engines Supporting Investing

- VA-run cohosting with net \$300–\$600 per month per client.
- Single arbitrage unit only after decision gate; target net \$700–\$1,000 per month.
- Redirect freed cash to DCA and debt elimination before adding risk.

Income Sleeve (Retirement-Only, Optional)

- **STRF**: 10% cumulative preferred, senior among preferreds; steadier checks, board-declared.
- **STRC**: variable-rate, cumulative, monthly cadence with rate adjustments aimed near par.
- **MSTY/IMST**: option-income ETFs on MSTR; higher and variable distributions, with upside capped and no downside protection.
- Sizing: 5–10% of retirement balance, DCA over three months. Skip entirely if cash is tight.

Rebalancing Strategy

- Quarterly check-in. Keep DCA steady; prioritize paying down high-cost debt first.
- Pause increases to DCA if emergency fund or debt coverage slips.

Year One Value Breakdown

Tax and Documentation Strategies

Item	Estimated Value
Accountable Plan reimbursements	\$1,800 – \$3,200
Home office (chosen method)	\$1,500 – \$3,600
Augusta Rule (14 days with FMV)	\$2,100 – \$3,500
Mileage and local travel	\$400 – \$900
QBI on cohosting profit	\$800 – \$2,400
De-minimis + 12-month rule	\$300 – \$800
Solo-401(k) employer contribution (starter)	\$300 – \$1,200
Tax subtotal	\$7,200 – \$15,600

Business Cash Flow

Item	Estimated Value
Cohosting (1 client, VA-assisted)	\$3,600 – \$7,200
Arbitrage (1 unit partial-year, only if gate passes)	\$3,500 – \$7,500
Business subtotal	\$3,600 – \$14,700

**Base (tax + cohosting; no
arbitrage, no sleeve)** **\$14,900 –
\$27,700**

**With arbitrage (1 unit
partial-year)** **\$18,400 –
\$35,200**

Maximizing Your Returns

- Keep every 0% promo current and calendar the exact end dates.
- Crush the 10.84% loan first; roll freed minimums forward using a strict avalanche by promo expiry.
- Maintain clean documentation for reimbursements, Augusta meetings, and home office to lock in deductions.
- Let the VA handle day-to-day guest comms and reporting so you preserve energy for decisions.

Key Success Factors

- Follow the decision gate before taking an arbitrage lease.
- Measure weekly KPIs for cohosting and the unit if launched.
- Keep DCA automatic and modest until debt service improves.

Action Plan

This Week

- Form LLC and open a dedicated business checking account.
- Adopt an Accountable Plan and set the monthly reimbursement routine.
- Build your owner lead list and draft the one-page cohosting offer.

This Month

- Hire a VA and implement Hospitable and PriceLabs SOPs.
- Begin outreach to 25 owners and book five calls.
- Launch BTC DCA at \$25–\$50 per week.

Ongoing Monthly

- Submit reimbursement packet, update mileage and home-office logs.
- Review debt calendar and utilization; request APR reductions if needed.
- Deliver monthly KPI report to cohosting clients.

Quarterly Reviews

- Check DCA sizing vs. cash flow; only increase after debt improves.
- Reassess arbitrage decision gate in Month 4–6.

December Tax Optimization Checklist

Two Weeks Before Year End

- Run a year-end tax projection and confirm QBI eligibility.
- Plan eligible prepaids under the 12-month rule.

Final Week Actions

- Process the December Accountable Plan reimbursement.
- Purchase any de-minimis items needed soon.

Year End Documentation

- Finalize the home-office log, mileage log, and Augusta minutes with FMV comps.
- Archive monthly receipt packs and bank statements.

Compliance and Risk Management

Required Registrations

- LLC formed with EIN and business bank account.

Audit Ready Documentation

- Accountable Plan policy, expense policy for de-minimis and 12-month rule, Augusta calendar, and FMV comps.
- Logs: mileage, home-office photos and measurements; software and VA invoices; owner contracts.

Ongoing Compliance

- Monthly reimbursement packets and clean bank separation.
- Retain BTC purchase records and custody notes; keep distribution statements for any income sleeve positions.

Professional Team

Essential Partners

- Tax professional familiar with STR and small-business deductions.
- Bookkeeper to maintain monthly packets and reconciliations.
- Real estate attorney for lease language if pursuing arbitrage.
- VA to operate cohosting systems and reporting.

When to Engage

- CPA now for policy setup; bookkeeper by Month 2–3; attorney before any arbitrage lease.

Summary

This plan is built around your reality: limited energy, limited capital, and the need for dependable relief now. A documented business layer for real tax savings, a VA-run cohosting service for cash flow, and automatic Bitcoin stacking for long-term asymmetric upside give you a practical path to recover, stabilize, and grow without grinding yourself down.

Next Steps At A Glance

- LLC, bank, and policies live this week.
- Owner outreach with a VA and SOPs this month.
- Keep the debt calendar and reimbursement packets spotless.

Note: Arbitrage only after the decision gate passes and cash coverage is in place.
