

PERSONALIZED WEALTH STRATEGY

Hang and Antonio Sanchez | October 2025

Executive Summary

This 12-month plan is built to 1) get property taxes handled and put your budget on autopilot, 2) clear high-interest debt fast while rebuilding HELOC eligibility, 3) install an audit-ready business layer for W-2 and 1099 income, and 4) automate steady wealth building with kids' savings and a simple Bitcoin allocation. Optional BTC-linked income sleeve and IREN remain included for later.

Base plan, no new property	\$26,000 –	If STR cost seg + bonus	\$38,000 –
– Year-One Value	\$72,000	depreciation	\$114,000

Ranges depend on actual 1099 profit, vehicle use, and bill reductions. STR path is optional and only if reserves are in place. A small BTC-linked income sleeve in retirement accounts can add ~\$1,200 – \$4,800 depending on sizing.

30 Day Launch Checklist

Week 1 — Cash-flow rails and taxes

- Open three accounts: Bills, Spend, Safety. Move every autopay to Bills.
- Create two sinking funds inside Bills: “Property Tax” and “Home Insurance.” Divide annual totals by pay periods and auto-transfer each payday.
- Call county treasurer to request a written installment plan; if not available, pay via a single 0% balance transfer and auto-pay to zero 60–90 days before promo expiration.
- Homestead & appeal check. File/confirm homestead exemption and calendar the assessment-appeal window; order a quick CMA to support lowering assessed value.

Week 2 — Business layer and documentation

- Open a dedicated business checking for the LLC; connect QuickBooks or Zoho.
- Sign an Accountable Plan to reimburse phone, internet, mileage, and home office.
- Build an Augusta Rule calendar for 12 meetings with agendas and 2–3 FMV comps.
- Business bank bonus. Open one business checking with a cash signup bonus (no credit pull) and meet activity requirements using vendor payments.

Week 3 — Tax, retirement, and credit tune

- Right-size your W-4 so you break even (no large refund).
- For 1099 profit, open a Solo 401(k) or SEP-IRA; turn on a 30% tax set-aside for every 1099 deposit.
- Push all card utilization < 30% with one mid-cycle payment on the highest card. No new personal credit applications.

Week 4 — Budget automation and income

- Lock a weekly Money Friday (10 minutes): confirm autopays; sweep any extra to the target debt.
- Kids: open one 529 for each child and start \$25/mo each.
- Vending route: place one machine only if terms are great, COGS $\leq$ 55%, shrink $\leq$ 3%, time $\leq$ 1 hr/week.
- Resale certificate & rebates. Get a state resale certificate so inventory is sales-tax-exempt; enroll in vendor case/brand rebates; switch to lowest-fee card readers.

Tax Optimization Playbook

1. Accountable Plan reimbursements

Monthly reimburse phone %, internet %, home office, and mileage from the LLC with receipts.

Estimated value: \$2,000 – \$4,000

2. Home office — choose the higher method

Use simplified \$5/sq-ft (max \$1,500) or actual % of housing costs. Decide annually based on which yields more.

Estimated value: \$1,000 – \$1,500

3. Augusta Rule (up to 14 tax-free days)

Invoice your LLC at local FMV; keep agendas, minutes, and three comps; pay from LLC.

Estimated value: \$2,500 – \$5,600

4. Vehicle deduction

Deduct business mileage or actual expenses for vending/cohosting trips. Keep a contemporaneous log.

Estimated value: \$1,500 – \$4,000

5. QBI deduction on 1099 profit

Up to 20% deduction on qualified business income, subject to thresholds and wage/basis limits.

Estimated value: \$2,000 – \$7,000

6. Solo-401(k) employer contribution or SEP

Shelter a portion of 1099 profit; Solo 401(k) is typically more flexible for higher contributions.

Estimated value: \$4,000 – \$10,000

7. Tangible-property rules

Expense items $\leq$ \$2,500 per invoice and apply the 12-month rule for eligible prepaids.

Estimated value: \$500 – \$1,500

8. Health accounts if eligible

Use HSA with an HDHP and DCFSA for childcare when offered.

Estimated value: \$1,000 – \$3,000

9. Rental activity shield

For LTRs, cost segregation can create passive losses to shelter rental income now and bank carryforwards.

Estimated value: \$1,000 – \$3,000

10. Withholding tune

Adjust W-4 for a break-even result to free monthly cash for debt and taxes.

Estimated monthly lift: \$200 – \$600

11. Homestead exemption & property-tax appeal

File homestead where available and challenge assessed value with comps when supported.

Estimated value: \$500 – \$2,000

Airbnb Arbitrage Execution Plan

Market Screening Criteria

- STR-friendly regulations; no HOA or lease restrictions on short-term stays.
- Breakeven at $\leq 50\%$ occupancy at realistic ADR; seasonality tolerable with monthly average RevPAR targets.
- Demand drivers within 15–20 minutes: hospitals, business parks, universities, event venues, or tourism clusters.
- Supply quality: top listings with 4.8+ rating and strong photo quality; room to differentiate.
- Operating costs: utilities, internet, cleaning labor, and taxes mapped; safety and parking verified.

Unit Economics Framework

- Upfront: first month + deposit + furnishings + setup + permits.
- Monthly P&L: rent, utilities, internet, cleaning, consumables, platform fees, insurance.
- Targets: contribution margin $\geq 30\%$, payback on furnishings $\leq 10\text{--}12$ months, cash buffer 1–2 months of total costs.
- KPIs: ADR, Occupancy, RevPAR, cleaning cost per turn, 5-star review rate.

Launch Sequence

- Landlord pitch with sublease clause and additional insured language; execute MSA with option to extend.
- Obtain business license, COI, and local registrations; collect resale certificate for furnishings where applicable.
- Install furnishings and durable essentials; photo-first design; professional photography.
- Set up dynamic pricing, cleaner SOPs, inventory par levels, and automated guest messaging.
- Publish listing with launch promotions; track KPIs weekly and adjust pricing and operations.

Investment Strategy and Portfolio Allocation

Core Philosophy. Keep the plan simple and automated. Stabilize cash flow first, then grow steadily with small Bitcoin DCA and tax-advantaged contributions. Protect downside with emergency reserves and disciplined debt reduction.

Primary Engine — Bitcoin DCA + Tax-Advantaged Savings

- DCA \$50–\$100/mo now; raise to \$150–\$250/mo after one-month emergency fund and two debts retired.
- Buy via River or Strike; move to hardware wallet when meaningful; upgrade to 2-of-3 multisig above 1 BTC.
- Open Solo 401(k) or SEP for 1099 profit; prioritize employer contributions once profit is consistent.
- Kids: open and fund 529s at \$25/mo each; increase as debts fall.

Accelerators — Select, Tiny, and Measured

- *IREN* (satellite): data-center/bitcoin miner expanding into AI compute. Treat as $\leq 1\%$ satellite, IRA preferred.
- Operations: vending COGS savings, bank bonuses, and expense control compound cash available to invest.
- Property (optional): consider STR after reserves and debt are healthy; use cost seg + bonus depreciation if executed.

Income Sleeve (Optional, Retirement Accounts Preferred)

- *STRF* — cumulative preferred. Target steadier income; senior among preferreds; board must declare.
- *STRC* — variable-rate cumulative, monthly cadence. Rate can reset; cumulative protection helps smooth gaps.
- *MSTY/IMST* — option-income ETFs on MSTR. Higher/variable distributions, capped upside, no downside protection.
- Sizing: keep tiny (5–10% of retirement at most) or skip until debt and reserves are firm.

Rebalancing Strategy

- Cash flow → one-month Safety fund → target debt payoff → raise DCA and 529s.
- Annually: trim satellites back to targets; keep BTC DCA steady through cycles.
- Pause new satellites if utilization rises above 30% or Safety fund dips below one month.

Year One Value Breakdown

Tax and Documentation Strategies	
Accountable Plan	\$2,000 – \$4,000
Home office (chosen method)	\$1,000 – \$1,500
Augusta Rule	\$2,500 – \$5,600
Vehicle deduction	\$1,500 – \$4,000
QBI	\$2,000 – \$7,000
Solo-401(k)/SEP	\$4,000 – \$10,000
Tangible-property rules	\$500 – \$1,500
Health accounts (HSA/DCFSA if eligible)	\$1,000 – \$3,000
Rental shield/carryforwards (if LTR)	\$1,000 – \$3,000
Homestead & property-tax appeal	\$500 – \$2,000
Tax subtotal (no new property)	\$16,000 – \$41,600

Business Cash Flow	
APR reduction / faster payoff	\$2,400 – \$7,200
Property-tax penalty avoidance	\$300 – \$1,200
Bill cuts & retention credits	\$1,800 – \$3,600
Withholding tune (monthly lift)	\$2,400 – \$7,200
Vending COGS savings (resale/rebates/fees)	\$380 – \$1,080
Business bank signup bonus	\$300 – \$1,000
Cash-flow subtotal	\$7,580 – \$21,280

Investment growth or income (included in totals)

- BTC DCA potential gains used in totals: \$600 – \$1,800
- Optional sleeve later (STRF/STRC/MSTY/IMST): \$1,200 – \$4,800

**Year-One Total (base
plan)**

**\$26,000 –
\$72,000**

**If STR cost seg + bonus
depreciation**

**\$38,000 –
\$114,000**

Maximizing Your Returns

- Automate transfers to Bills, Safety, and tax set-aside so decisions are not left to memory.
- Document the Accountable Plan and Augusta processes once; reuse every year.
- Keep utilization under 30% across cards; make a mid-cycle payment on the top balance.
- Standardize vending purchasing with the resale certificate, brand rebates, and the lowest-fee readers.
- Stay small and steady on BTC; avoid chasing price. Protect seed phrases and beneficiaries.

Key Success Factors: weekly Money Friday, accurate bookkeeping, timely estimated taxes, and fast feedback on KPIs.

Action Plan

This Week

- Open Bills/Spend/Safety accounts and move autopays.
- Start property-tax and insurance sinking transfers; call county for installment plan.
- Sign the Accountable Plan; begin monthly reimbursements.
- Build Augusta calendar with agendas and FMV comps.
- Tune W-4; push utilization < 30% with one mid-cycle payment.
- Open kids' 529s (\$25/mo each) and begin BTC DCA \$50–\$100 if comfortable.
- Place one vending machine only if terms are excellent; get resale certificate and enroll in rebates.
- Open one business checking with a cash bonus and route vendor payments through it.

This Month

- Connect bookkeeping; categorize 60 days of activity; reconcile accounts.
- Set up the 30% tax set-aside on every 1099 deposit.
- Create SOPs for vending restock, cash control, and weekly KPI review.

Ongoing Monthly

- Money Friday: check autopays, sweep surplus to target debt, update KPI sheet.
- Accountable Plan reimbursements with receipts saved to the month's folder.
- 529 and BTC DCA contributions; safety fund progress check.

Quarterly Reviews

- Mid-quarter tax projection for 1099 income; true-up estimated payments.
- Credit hygiene: utilization check, disputes if needed, no new personal credit.
- Revisit arbitrage/cohosting opportunity after reserves improve.

December Tax Optimization Checklist

Two Weeks Before Year End

- Finalize Augusta meetings and payments; complete Accountable Plan reimbursements.
- Confirm Solo 401(k)/SEP contributions and employer amounts.
- Prepay eligible 12-month expenses under the 12-month rule where helpful.

Final Week Actions

- If buying property, place in service by Dec 31 to start depreciation.
- Mileage log export and photo of odometer; scan receipts to year-end folder.
- Verify W-4 and next-year withholding settings.

Year End Documentation

- Save bank and credit card statements, payroll docs, 1099s received/sent, and Augusta binder.
- Close books and deliver to CPA with a summary of changes and questions.

Compliance and Risk Management

Required Registrations

- EIN, state entity registration, and local business license.
- Sales tax/resale certificate for vending inventory.
- Short-term rental permits if applicable; additional insured certificates for landlords.

Audit-Ready Documentation

- Accountable Plan policy + monthly reimbursements with receipts.
- Augusta agendas, minutes, FMV comps, and invoices.
- Mileage logs and vehicle expense records.

Ongoing Compliance

- Quarterly estimated taxes as needed; annual information returns (W-2, 1099-NEC).
- Monthly reconciliations; yearly inventory and asset schedule updates.
- Insurance review: term life, disability, umbrella after two debts are gone.

Professional Team

Essential Partners

- CPA familiar with W-2, 1099, vending, and STR rules.
- Bookkeeper to reconcile monthly and maintain the audit trail.
- Attorney for leases, STR addenda, and entity updates.
- Insurance broker for home, auto, umbrella, STR, and liability.
- Local lender/credit union for HELOC re-qualification.

When to Engage

- CPA now for withholding tune and year-end projection; again in February for filings.
- Bookkeeper immediately; monthly cadence.
- Attorney before signing any sublease or management agreement.
- Broker before adding any unit or major asset.

Summary

The priority is to stabilize taxes and cash flow, remove high-interest drag, and automate small but consistent investing for the family. The optional STR and income sleeve can be added once reserves and credit are clean. This keeps momentum high and risk low.

In One Glance

- Three-account cash-flow system with tax and insurance sinking funds.
- Accountable Plan + Augusta binder locked for audit readiness.
- Debt utilization < 30% with a mid-cycle payment habit.
- 529s open; BTC DCA steady; Solo 401(k) or SEP ready for employer contributions.
- Optional STR path and tiny satellites once Safety fund and debt targets are met.

Note: Share take-home pay and last year's tax/insurance amounts to compute exact per-paycheck transfers and a debt snowball you can run tomorrow.
